## July 2019**v**

## LAND REQUEST FORM (LAND-USE AGREEMENT AND FEE) COLUMBIA BASIN AGRICULTURAL RESEARCH CENTER PENDLETON AND MORO STATIONS

(Effective July 1, 2013)

The land-use agreement will be used to coordinate experiments at the Sherman and Pendleton Stations. The agreement, with your proposed plot diagram and description of experimental variables attached, will provide important planning and historical records for experiments performed on these Stations. Land-use allocations will be made preferentially to faculty of the Center, and to other scientists and extension agents on a first-request, first-allocation, space-available basis.

The land-use fee will distribute approximately 30% of the land preparation and maintenance costs to users of the land. The land-use agreement and fee will be required for use of land, equipment, facilities and/or supplies administered by the Columbia Basin Agricultural Research Center.

Oregon State Employees (Extension and/or Research) are considered "Internal". All other land users are considered "External".
