PTW: Potato Tuberworm

BLH: Beet Leafhopper

FYI

Welcome back to our weekly Potato Update. A next trapping season started !!! We will be sending our weekly reports every Friday. If you have any question(s), call Silvia @ 541 567-8321. This week, no tuberworm or beet leafhoppers were found. Several moths were caught in our traps. The most predominant, the celery looper (*Anagrapha falcifera*). The larvae feed on beets, blueberries, clover, corn lettuce and other plants.
