PTW: Potato Tuberworm
 BLH: Beet Leafhopper
 OLH: Other

PA: Potato Aphids
 GPA: Green Peach Aphid
 OA: Other Aphids

FYI

The potato tuberworm moth (PTW) made its first appearance into our traps this week. One moth was caught in trap # 34. Top picture, larva (photo credit: Lynn Ketchum OSU); below, adult (ODA). Leafhoppers counts dropped moderately compared to last week. More information at:

We are now on facebook !!!

LATE BLIGHT HOTLINE 1-800-705-3377

Late blight has been confirmed north of Pasco and west of Burbank. Weekly applications of protectant fungicides are still recommended.

The OSU Area-wide monitoring program support is provided by the Oregon Potato Commission and OSU Extension Service. **This is an alert system; growers are encouraged to install their own traps for field specific monitoring.**
