PTW: Potato Tuberworm
 BLH: Beet Leafhopper
 OLH: Other Leafhopper

PA: Potato Aphids
 GPA: Green Peach Aphid
 OA: Other Aphids

FYI

Have you seen this wasp?

This wasp was ID as *Campoplex*. It was collected in eastern Oregon in potato fields. Not sure about the specie yet, but, one specie, *Campoplex haywardi*, a solitary wasp, has been identified as an internal parasite of larvae of the potato tuberworm.

Current and historical data at:

<http://oregonstate.edu/dept/hermiston/trap-reports>

OSU-HAREC Entomology:

<http://oregonstate.edu/dept/hermiston/entomology-laboratory>

Late blight has been confirmed in 6 fields, 4 field north of Pasco and 2 toward Burbank. More infected fields are likely. Continue to scout and maintain weekly protectant fungicide applications.

LATE BLIGHT HOTLINE

1-800-705-3377

The OSU Area-wide monitoring program support is provided by the Oregon Potato Commission and OSU Extension Service. **This is an alert system; growers are encouraged to install their own traps for field specific monitoring.**
